KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? <p>The value of the Sub-Fund and its distribution (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:</p>	Please refer to the “Risks” section on Page 2-5 of the AIA IFPS for further information on risks of the Sub-Fund.
Market and Credit Risks	
<ul style="list-style-type: none"> You are exposed to market risks. <ul style="list-style-type: none"> As the Sub-Fund invests in securities of issuers primarily in the Asian Region, the Net Asset Value of the Sub-Fund will be influenced by the prices of these investments. The investments in these markets may be affected by changes in political conditions, regulatory, economic and interest rates environment. You are exposed to risks in investing in specific markets. <ul style="list-style-type: none"> While investments in a single country, specific industries, sectoral or regional funds may present greater opportunities and potential for capital appreciation, they may be subjected to higher risks as they may be less diversified than a global portfolio. The regulatory, disclosure and financial reporting standards may differ significantly from, and offer less investor protection compared to, internationally recognised standards. 	
Liquidity Risks	
<ul style="list-style-type: none"> The Sub-Fund is not listed and you can only redeem on Valuation Days⁴. <ul style="list-style-type: none"> You should note that there may be a limit on the number of units that can be redeemed on any Dealing Day and an investor may not be able to redeem on a Dealing Day if the redemption limit is imposed. Should a limit be imposed, a redemption request may be deferred to the next Dealing Day (which is subject to the same limit) if the redemptions exceed the limit on that day. There is no secondary market for the Sub-Fund. All redemption requests should be made to the AIA Customer Service Centre or through your AIA Financial Services Consultant or Insurance Representative. 	Please refer to “Redemption of Units”, “Pricing and Cutoff Times” and “Suspension of Dealings” under the Other Material Information section of the Product Summary of your Insurance Plan.
Product-Specific Risks	
<ul style="list-style-type: none"> You are exposed to risks in investing in equities. <ul style="list-style-type: none"> The value of the securities in which the Sub-Fund will invest will fluctuate depending upon the general trends of stock markets and prevailing interest rates. The economic environment of the countries in which the Sub-Fund invests will have an impact on the value of the securities acquired. The value of the Sub-Fund is affected by such changes in the market conditions and interest rates. You are exposed to risks in using derivative instruments. <ul style="list-style-type: none"> The Sub-Fund is authorised to use derivative instruments from time to time. As the volatility of prices of derivative instruments may be higher than that of their underlying stocks, commodities or other benchmarks, these derivative instruments are riskier. You are exposed to QFII Risks <ul style="list-style-type: none"> The Sub-Fund may incur losses due to limited investment opportunities in China A shares, or may not be able to fully implement its investment objectives, due to QFII investment restrictions, illiquidity of the China A shares market, and/or delay or disruption in execution of trades or in settlement of trades. 	

- **You are exposed to risks associated with Stock Connect**
 - The Sub-Fund may invest in certain China A shares through Stock Connect. The ability to trade through Stock Connect in a timely manner may be affected by quota limitations and PRC regulatory restrictions. A suspension in trading through Stock Connect will adversely affect the ability to access the PRC market. Differences in trading days in the PRC and Hong Kong markets also leads to the risks of price fluctuations in the shares when Stock Connect is not trading.
 - Trading through Stock Connect is subject to other risks, including clearing and settlement risks (e.g. if the PRC clearing house defaults on its obligation, the Sub-Fund may suffer delays and/or inability to recover losses), restrictions on selling imposed by front-end monitoring, nominee arrangements in holding China A shares and regulatory risk.
- **You are exposed to sustainability risks.**
 - Sustainability Risk is principally linked to climate-related events resulting from climate change (physical risks) or to society's response to climate change (transition risks), which may result in unanticipated losses that could affect a Sub-Fund's investments and financial condition. Social events (e.g. inequality, inclusiveness, labour relations, investment in human capital, accident prevention, changing customer behaviour, etc.) or governance shortcomings (e.g. recurrent significant breach of international agreements, bribery issues, products quality and safety, selling practices, etc.) may also translate into Sustainability Risks.
